

New delivery form

CREMANA[®]-derm protect

We are happy to offer you our successful greasing and silicone-free skin protection and barrier cream CREMANA[®]-derm protect in the new handy and economic tube of 125 ml contents. In addition to the well-known properties of this product, the advantage of the new delivery form in a tube is the significantly better and user-friendly dosage as well as the convenient handling.

The new tube is available under **REF 3509**. Our successful formulation remains unchanged. Therefore you can protect your skin as usual when it comes in contact with water-based products such as cleaning and disinfection agents or when wearing gloves.

To CREMANA[®]-derm protect

New approvals from Morita

Alpron, Bilpron, Starter- and TechnicianSet

Approved for the use for biofilm removing and disinfection of the waterlines in Morita dental treatment units.

AlproJet-D, -DD and -W

Approved for the use for cleaning and disinfection of the aspiration tubes and the spittoon bowls.

MinutenSpray-classic, MinutenWipes, PlastiSept eco, PlastiSept-Wipes eco, CidWipes eco

Approved for the cleaning and disinfection of surfaces of Medical Devices.

WL-clean, WL-cid and WL-dry

Approved for cleaning, disinfection and drying of the spray water and spray air channels and all inner surfaces in Morita turbines, handpieces and contra-angles.

Starter and TechnicianSets

BRS with Bilpron for Planmeca

Starter- and TechnicianSets which are matched to Planmeca units are now available. For a better distinction the following REF numbers are applied with immediate effect:

REF 3204-N BRS-TechnicianSet Standard
REF 3204-PM BRS-TechnicianSet Planmeca

REF 3179-N Bilpron StarterSet Standard
REF 3179-PM Bilpron StarterSet Planmeca

Please note: The Sets for Planmeca units can also be used for dental units of all other manufacturers like the Standard Sets, but the Standard Sets cannot be used for Planmeca units.
