

Efficacy against Filoviridae

**Ebola and Marburg virus**

The family of Filoviridae is part of the enveloped single-stranded RNA viruses which include amongst others the pathogens of Ebola as well as the Marburg virus. Both the Ebola virus and the Marburg virus cause a haemorrhagic fever, which in the case of Ebola has a mortality rate of 25 to 90 percent and in the case of the Marburg virus a mortality rate of 24 to 88 percent.<sup>1</sup>

All disinfection products of ALPRO MEDICAL GMBH comply with the recommendations of RKI<sup>2</sup>. They are therefore effective against enveloped viruses and thus also against the Ebola virus as well as the Marburg virus. MinutenSpray-classic, PlastiSept, DesNet+, AlproSept-HDE, BIB forte eco, MinutenWipes, PlastiSept-wipes, WL-cid, CidWipes eco are virucidal according to DVV 2012.

**All ALPRO disinfectants are effective against the Ebola virus and the Marburg virus and meet the requirements of the RKI.<sup>2</sup>**

New product

**New SteriSponge**

The satisfaction of our customers is our primary concern. In order to provide you with products of best possible quality, we have now added a new SteriSponge for the cleaning of autoclaves to our program. Compared to the previous model this sponge is even gentler on the material, optimally takes up dirt and has a handy shape.
